Here are answers to questions you may have about the key features, benefits, and rules of your plan.

**When can I enroll in the Plan?**
There is no waiting period. You can enroll in the Plan at any time. Membership in the ACC or GTM is required.

**How do I enroll in the Plan?**
If you’re ready to get started, enrolling is easy. First, obtain the Contribution Calculation Form from your ACC Retirement Plan Administrator, from the ACC Website at www.accantors.org, or from the back of this guide. Return the completed form to your ACC Plan Administrator:

Fax: 847-781-7801  
Email: retirement@acccantors.org  
Website: www.acccantors.org

*Please be sure to retain copies for your records.*

Remember, this form must be submitted to your ACC Plan Administrator before any contributions can be deducted from your pay.

Next, follow these steps:

1. Go to http://enrollonline.fidelity.com and follow the steps to set up your ACC Retirement Plan (403b) account. The plan ID number is: 71280. You may also set up your ACC Supplemental Plan account at the same time by choosing “add another plan” and inserting the plan ID number 71281.

2. Set up a username and password to get online and telephone access to your account(s). If you are already a Fidelity customer, you may continue to use your existing Password.

3. Log in to your account and click “Begin” found in the center of the screen. Follow the instructions to elect your investment options and beneficiaries online. Note: You must designate your investment elections; otherwise, your contributions will be allocated to the plan’s default money market account.

If you need assistance with the enrollment process, you may call a Fidelity Retirement Representative at 1-800-343-0860.

**How much can I contribute?**
You may make a salary deferral contribution up to 100% of your eligible compensation. However, this contribution is subject to the maximum limits imposed by the IRS. Any amount contributed over the maximum limit will be invested in the ACC Supplemental Plan. The Internal Revenue Code provides that the combined annual limit for total plan contributions in 2018 is 100% of your W2 compensation or $55,000, whichever is less.

**What is the IRS contribution limit?**
The IRS contribution limit for 2018 is $18,500.

**When is my enrollment effective?**
Your enrollment becomes effective once you complete and return the Contribution Calculation Form to your ACC Plan Administrator and you successfully enroll online at http://enrollonline.fidelity.com. Salary deferral contributions can then begin after your synagogue obtains access to Fidelity’s online employer system, Plan Sponsor Webstation (PSW), and deducts your first salary deferral amount from your paycheck pretax.
Does the Employer contribute to my account?
Your congregation can make an annual discretionary contribution on your behalf. Plan guidelines suggest that this contribution be equal to at least 15% of your annual eligible compensation. The employer contributions will be contributed into your account along with any salary deferral contributions you decide to make. It is your responsibility to work with your congregation to ensure that the contributions are submitted directly to Fidelity Investments via Fidelity’s Plan Sponsor WebStation (PSW) online system in a timely manner.

Target Date Funds

Placement of investment options within each risk spectrum is only in relation to the investment options within that specific spectrum. Placement does not reflect risk relative to the investment options shown in the other risk spectrums.

Investment options to the right have potentially less inflation risk and more investment risk

Target date investments are generally designed for investors expecting to retire around the year indicated in each investment’s name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity’s analysis of the characteristics of the general investment categories of the investment options and not on the actual security holdings, which can change frequently. Investment options in the Domestic Equity category are based on the options’ Morningstar categories as of 04/30/2018. Morningstar categories are based on a fund’s style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options’ objectives and do not predict the investment options’ future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category, and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decision. The spectrum does not represent actual or implied performance.

Who may want to invest:
- Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

Footnotes:
- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.
- Duration is a measure of a security's price sensitivity to changes in interest rates. Duration differs from maturity in that it considers a security's interest payments in addition to the amount of time until the security reaches maturity, and also takes into account certain maturity shortening features (e.g., demand features, interest rate resets, and call options) when applicable. Securities with longer durations generally tend to be more sensitive to interest rate changes than securities with shorter durations. A fund with a longer average duration generally can be expected to be more sensitive to interest rate changes than a fund with a shorter average duration.

Loomis Sayles Small Cap Growth Fund Class N

VRS Code: 91818

Fund Objective: The investment seeks long-term capital growth.

Fund Strategy: The fund normally will invest at least 80% of its net assets (plus any borrowings made for investment purposes) in the equity securities of “small-cap companies,” including preferred stocks, warrants, securities convertible into common or preferred stocks and other equity-like interests in an entity. Currently, the manager defines a small-cap company to be one whose market capitalization either falls within the capitalization range of the Russell 2000® Index, an index that tracks stocks of 2,000 of the smallest U.S. companies, or is $3 billion or less at the time of investment.

Fund Risk: The securities of smaller, less well-known companies can be more volatile than those of larger companies. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

T. Rowe Price Retirement Balanced Fund
VRS Code: 47364

Fund Objective: The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income.

Fund Strategy: The fund invests in a diversified portfolio of other T. Rowe Price stock and bond funds that represent various asset classes and sectors. It is intended for retired investors who seek income and relative stability from bonds along with some capital appreciation potential from stocks. The fund’s “neutral allocations,” which are what T. Rowe Price considers broadly appropriate for investors during their retirement years, are 40% stock funds and 60% bond funds. While the fund is non-diversified, it invests in diversified underlying holdings.

Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund Risk: Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. - Weighted Average Maturity (WAM) This is a weighted average of all the maturities of the securities held in a fund. WAM can be used as a measure of sensitivity to interest rate changes and markets changes. Generally, the longer the maturity, the greater the sensitivity to such changes. WAM is based on the dollar-weighted average length of time until principal payments must be paid. Depending on the types of securities held in a fund, certain maturity shortening devices (e.g., demand features, interest rate resets, and call options) may be taken into account when calculating the WAM.
- Weighted Average Life (WAL) For money market funds, this is the weighted average of the life of the securities held in a fund or portfolio and can be used as a measure of sensitivity to changes in liquidity and/or credit risk. Generally, the higher the value, the greater the sensitivity. WAL is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening features other than interest rate resets. For money market funds, the difference between WAM and WAL is that WAM takes into account interest rate resets and WAL does not. WAL for money market funds is not the same as WAL of a mortgage- or asset-backed security.

¹ Your employer can make a discretionary contribution on your behalf. Plan guidelines suggest a minimum of 15% of your annual eligible compensation. Not including catch-up contributions, but including salary deferral contributions, the maximum aggregate annual contribution that can be made on your behalf is the lesser of $55,000 or 100% of your 415 Compensation. Any amount contributed over the maximum limit will be invested in the ACC Supplemental Plan.

² You may make a salary deferral contribution up to 100% of your eligible compensation on a before tax basis. However, this contribution is subject to the maximum limits imposed by the IRS. $18,500 in 2018, plus an additional $6,000 if you are age 50 or older at December 31, 2018. Any amount contributed over the maximum limit will be invested in the ACC Supplemental Plan. Your congregation is required to remit this contribution directly to Fidelity at the time it is earned.

³ The Employer hereby adopts the American Conference of Cantors Retirement Plan, A 403(b) Qualified Church Plan and the American Conference of Cantors Supplemental Retirement Plan, and irrevocably designates the Executive Board of the American Conference of Cantors as its agent with respect to all of its relations with the Trustees and Committee of the ACC Plans. 1. YOUR INFORMATION

Please provide your information in this section.

2. INVESTMENT PROVIDER YOU ARE MOVING MONEY FROM

Please review your most recent statement for this name and address, and include a copy of the statement with this form. Please contact your previous investment provider to see if additional paperwork is required.

3. ACCOUNT(S) OR CONTRACT(S) TO MOVE

Account or Contract Number: This number is available on your previous investment provider account statement. If you are unable to locate this number on your statement, please contact the investment provider. If you do not provide an account or contract number, we will use your Social Security number or U.S. Tax Identification number to request the assets to be moved.

Type of Account or Contract: If you are unsure of the type of account or contract, please contact the Previous Investment Provider or refer to your statement. Select at least one.

The Account or Contract Number is from: Please see the descriptions below that relate to each of the four transactions. If you choose “A Previous Employer,” provide the name of that employer.

   The Same Employer as My Employer Plan with Fidelity. Movement of assets from 403(b) to 403(b) will be requested as a vendor or contract exchange. Movement of money between the same plan types, excluding 403(b) plans [401(a) to 401(a), 401(k) to 401(k), 457(b) to 457(b)], will be requested as an in-plan transfer. Movement of money between different plan types will be requested as a rollover.

   A Rollover IRA. This is a rollover transaction. After-tax value may not be rolled from an IRA.

   A Traditional IRA or SEP IRA. This is a rollover transaction. Roth IRAs and Coverdell IRAs cannot be accepted.

Liquidation Amount: Specify the amount of money you want moved to your Fidelity account. If you choose “Full Liquidation/100%,” Fidelity will request your full balance. If you choose “Partial Liquidation,” Fidelity will request the dollar amount or percentage you specify. If you do not specify an amount, Fidelity will move/liquidate 100%. If you are moving 457(b) assets, please be aware that governmental 457(b) assets must be moved into a governmental 457(b) plan, and nongovernmental 457(b) assets must be moved into a nongovernmental 457(b) plan. Transfers from nongovernmental 457(b) plans are not provided for on this form. Talk with your plan sponsor or call Fidelity to discuss transfers from nongovernmental 457(b) plans. Rollovers from 403(b) plans, 401(a)/(k) plans, and IRAs to governmental 457(b) plans must be recordkept in separate rollover sources to limit the distributions that may be subject to a 10% early distribution penalty.
